PROFILE

I am passionate about Python development and automation testing with Selenium, eager to contribute to impactful projects while continuously learning and exploring new technologies to drive innovation and success.

PROFESSIONAL EXPERIENCE

Product Engineering Intern

09/2024 – present
Chennai, India

- Gained hands-on experience in automation testing using Selenium with Java, including Maven/Gradle integration, browser automation, cross-browser testing, dynamic element handling, and advanced waiting mechanisms.
- Utilized TestNG/JUnit for test execution, wrote comprehensive test scenarios for the company's website, and worked with REST APIs using Postman for testing and validation. Additionally, learned HTML to enhance interaction with web elements.

EDUCATION

B.Tech CSE- Big Data Analytics

SRM UNIVERSITY
CGPA 8.47

09/2021 – present
Chennai, INDIA

BIEAP

Vignana Sudha junior collage
90%

06/2020 – 05/2021
chittoor, India

PROJECTS

Pothole Detection in Real-time using YOLOv10

06/2024 – 09/2024

- Develop a real-time pothole detection system leveraging the YOLOv10 model to identify potholes from live traffic camera feeds or recorded videos.
- This system can be used for smart city infrastructure maintenance and improving road safety.

Churn Analysis Using Artificial Neural Network (ANN)

01/2024 – 02/2024

- This project addresses the issue of customer churn in the telecommunications industry. By analyzing customer data, the project aims to predict which customers are likely to churn, enabling the company to take proactive measures to retain them.
- **Technologies Used:** pandas, numpy, matplotlib, seaborn, TensorFlow, Keras

Gender Detection

11/2023 – 11/2023

- This project implements a Convolutional Neural Network (CNN) using TensorFlow and Keras to classify gender based on images.
- **Technologies Used:** Python, Pandas, scikit_learn

PUBLICATIONS

Improving Road Safety Through Pothole Detection With YOLOv10

International Journal of Research and Analytical Reviews (IJRAR)

22/09/2024

SKILLS

- Automation Testing using Selenium in java
- DBMS: SQL, MongoDB
- Machine Learning, Deep learning
- Programming: Python, JAVA for selenium scripts
- Python: NumPy, Pandas, Matplotlib, Seaborn, SKLearn, TensorFlow and Keras
- Functional testing
- Performance testing
- REST API
- POSTMAN API

CERTIFICATES

- Python for data science (NPTEL)
- Python for data science and machine learning bootcamp (UDEMY)
- Automation Explorer (UIPath)
- Create machine learning models (MICROSOFT)
- Introduction to Software Engineering (Coursera)
